

- For the iDesign Architects team

How your team will actually use the **Proposal Engine**.

Five screens. Three hours become ten minutes. No software to install. Built for the two-to-three people on your side who check every proposal before it goes out. Everything you see in the next few scrolls is what the tool will look like in your browser.

10 min

to draft and send a proposal, from 3-4 hours today

0

software to install, one browser tab is all you need

4 weeks

from kickoff to live in your studio

THE TEAM GUIDE, IN 5 SCREENS

No apps, no logins to different tools. One URL, bookmarked, works on laptop or phone.

*The best design brief your clients will see is the **one you direct in your own voice.***

DESIGN IS HOW IT WORKS - AND NOW, HOW IT WRITES ITSELF

EVERY PROJECT TYPE, THE SAME CINEMATIC TREATMENT

The Proposal Engine adapts the hero imagery, tone and line-item structure to each project type automatically. Below are four examples of how the generated proposal's hero section looks, by project type.

3BHK / 4BHK apartment

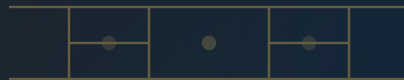

Villa or independent home

Office fit-out

Clinic or boutique commercial

*Every client proposal becomes a **quiet advertisement** for the studio that made it.*

AND YOUR CLIENTS CAN REOPEN THE LINK A YEAR LATER

WHAT CHANGES FOR THE TEAM

One list for what goes away. One for what your clients start getting that other Pune firms don't offer.
